EDUCATION

binghamton university '16

B.A. Psychology

app academy '16

full-stack web development

SKILLS

javascript
react
vue
redux
node
webpack
rollup
html
css/sass
jquery
git
ruby
ruby on rails

EXPERIENCE

view lift

nov 2016 - present

> migrated legacy jQuery/Backbone codebase to React/Redux with enhancements such as server-side rendering and offline asset caching

> produced a drag-and-drop content management website for clients to control their web, mobile, and TV apps all from one place

> created a reusable library of React components that shaved 30% of code from multiple projects

app academy

jun 2016 - aug 2016

projects:

> [BrainGain](#) - sole developer - flashcard-studying website built on a PostgreSQL database, Rails backend, and React frontend

> [Plips](#) - sole developer - ball-juggling browser game rendered with vanilla JavaScript and HTML5 Canvas

> [dommmDaniel.js](#) - sole developer - lightweight JavaScript library for DOM manipulation, AJAX, and event handling

personal

> [ColorCombos](#) - sole developer - website created with Vue for fetching visually appealing pairs of colors

> [JustWeatherCLI](#) - sole developer - command line interface for retrieving weather data based on provided configurations
